Finishing: Directions for Starching: Dissolve ¼ cup starch in ½ cup of cold water. Boil slowly over a low flame, as it thickens stir in gradually about 1¼ cups of cold water. Boil, stirring constantly until starch clears. This makes a thick pasty mixture. As soon as starch is cool enough to handle, dip hat and squeeze starch thru it thoroughly. Wring out extra starch. The hat should be wet with starch but there should be none in the spaces. Leave until thoroughly dry. If steam iron is used iron ruffle after it is dry. If regular iron is used dampen ruffle slightly before pressing. Cut ribbon in half and sew to each side of hat. Tie in bow.

COVER SKIRT is pattern 2322
—see page 39

• bassinette skirt

Materials: Hiawatha Elastic Sewing, 3 spools; 6 yds (36" wide plain fabric) for skirt; 4 yds (36" wide fabric in contrast or self-fabric) for ruffling and rouching; 2 spools of Thread.

Note: The above yardage requirements are based on size of bassinette featured on front cover. Yardage will vary depending upon size of bassinette, which measured 90" around. To determine correct yardage for skirt, measure around top of bassinette and double measurement. (Hiawatha Elastic Sewing Thread shirrs 2 to 1, for example, 2 yards of fabric will shirr into 1 yd). For top ruffle, bottom ruffle and rouching around hood, the yardage requirement is two thirds the amount of yardage used for skirt. Cut two 4" wide strips of fabric for rouching on crosswise of fabric. Cut **two** lengths of 4" wide strips of fabric for top ruffle and **four** lengths of 6½" wide strips of fabric for bottom ruffle.

Sewing: The Elastic Sewing Thread of Lastex Yarn shirrs as it sts. For shirring use Lastex in bobbin only of sewing machine. Wind bobbin as for regular sewing thread (but without tension). Thread machine as for ordinary sewing. Use regular machine thread in a medium size needle. Set machine to a long st (about 7 sts to the inch). Be sure to hold material flat.

For Skirt: For length of skirt, measure from top of bassinette to floor, adding ½" seam allowance for top of skirt and ½" seam allowance for bottom of skirt. Cut fabric to desired length. Turn under and st ½" seam allowance at top and bottom of skirt. Use Lastex as directed above, with right side of fabric facing you, start shirring along hemmed edge at top of skirt. St 15 to 20 rows of shirring ¼" apart (or use presser foot as a guide between rows). Steam shirring.

Top Ruffle: St tog the two 4" strips of fabric. Turn under and st a ⅛" hem at top and bottom of ruffle. Starting below hem st 5 rows of shirring. Baste to top of skirt ¼" below top edge. Remove Elastic Thread from bobbin. Using regular sewing thread in bobbin and at top, machine st along basting line.

Bottom Ruffle: St tog the four 6½" strips of fabric. Turn under and st a ⅛" hem at top and bottom of ruffle. Starting below hem st 6 rows of shirring. Baste to bottom of skirt 6" above bottom edge, leaving the ⅛" hem at top of ruffle for heading. Remove Elastic Thread from bobbin. Using regular sewing thread in bobbin and at top machine st along basting line.

Finishing Skirt: Allowing a ½" seam allowance, join skirt tog, using regular sewing thread in bobbin and at top. Sew skirt around top edge of bassinette by tacking. Space tacking ½" apart.

Rouching for Hood: St tog the two 4" strips of fabric. Turn under and st a ⅛" hem at top, bottom and each side. Working on wrong side of fabric with Lastex in **Bobbin**, st 3 rows of shirring thru center of fabric. Sew rouching to edge of hood by tacking. Space stitching 2" apart.

IT'S FUN TO STENCIL

Should junior want a favorite animal—a giraffe, for instance, on his T-shirt it can be done easily and quickly with your own stencil.

Use thin stencil paper to trace the design—one for the background color and one for the second color—in this case spots, ears and tail. See Picture 1 on opposite page.

Place background stencil in position—see Picture 2. Use a regular stencil brush or small oil brush and a fast-drying paint such as Flo-Paque. Apply paint with *dry* brush. Too much paint will cause bleeding and smudging. Brush paint from outside edges toward center, working the paint well into the fibres of the fabric.

When dry, apply darker color for spots, etc., using the second stencil. See Picture 3.

The stencil may be touched up using a soft watercolor brush. We added twigs and leaves—See Picture 4.

There are many sources for designs—wall-paper, greeting cards, story books, to name a few. After you have selected a design and traced it, use a sharp knife for cutting—X-Acto knives are made specifically for this purpose. After your first attempt at stencilling you will find decorating furniture, clothes and walls is fun and the results very gratifying.

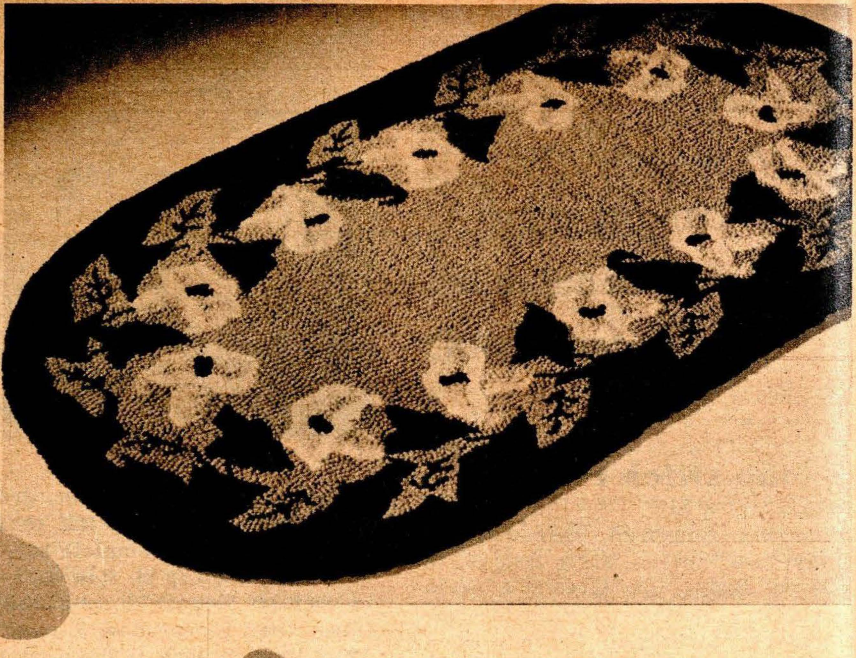
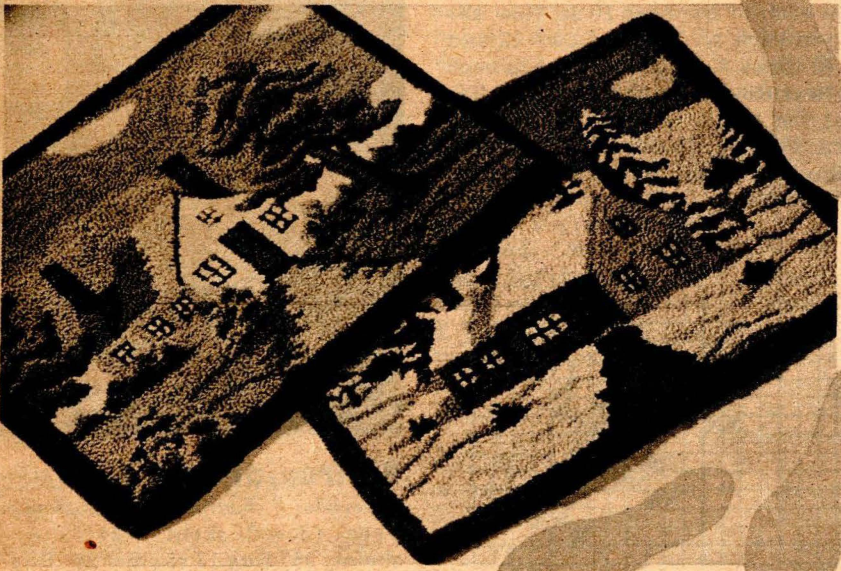
This manner of joining colors will give complete and even rows. (Do not start a new color at point where you break off old color.)

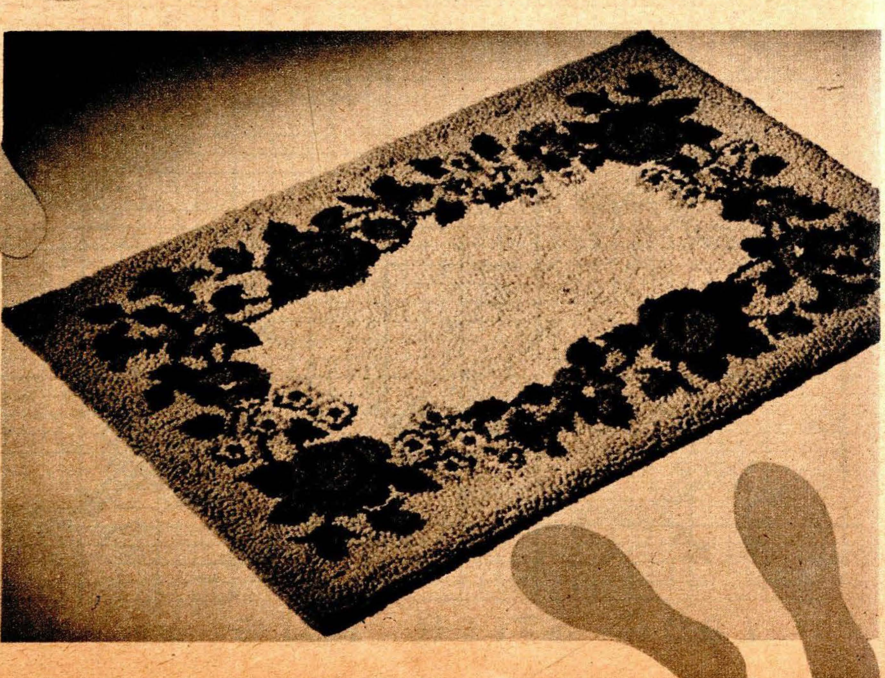
Steps to Beauty



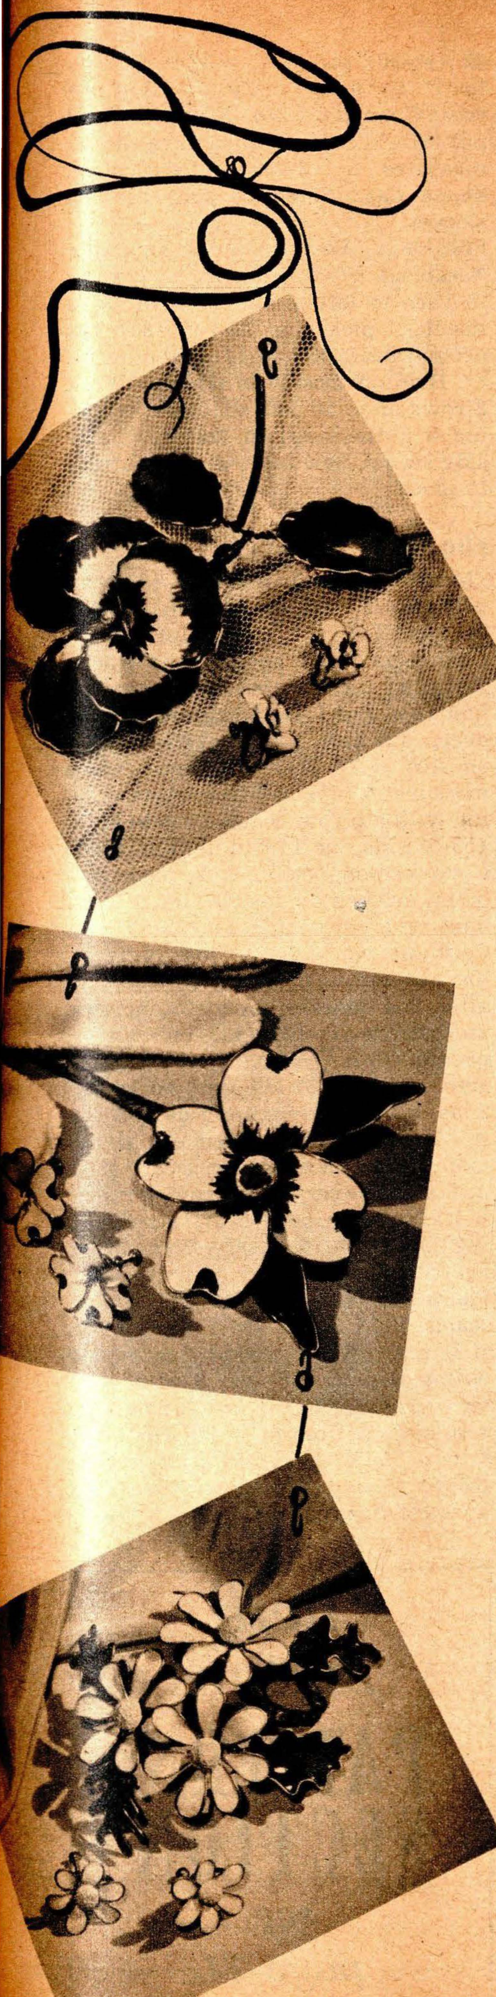


"Lilies"—the essence of Spring is yours the year round with Bucilla Rug Pattern #7368. This comes in three sizes on Duraweave, a clean and easy-to-work foundation.

Picture Rugs—Plan your dream house by working these pictures of a dear little cottage covered with snow or surrounded by summer greens. Dritz Hooked Rug Pattern #30/18 "Summer Scene"—#30/19 "Winter."



Roses and Morning Glories make a gay splash of color. Rug #459 on Hiawatha Burlap Canvas comes in two sizes—30x40 and 40x67. A new simplified color guide included.



Flowers that bloom

in the Spring are delightful but they wither and fade very quickly while plastic blossoms remain fresh and bright for a long, long time. Dogwood, pansies or daisies (shown on this page) make perfect pin and earring sets for the new season. To make them you'll need a Flexcraft Liquid Workshop. Using your favorite flower as a guide begin by—

Forming Wire: Individual petals and leaves may be made by looping and twisting lengths of wire over round forms of varying sizes, then bending into desired shape. The length of the wire will depend on the article being made. For example, for corsage flowers the wire should be about 9 inches, for earring flowers, about 3 inches. Various combinations of petal and leaf shapes may be copied from nature. Whole buds or flowers (multiple forms) can be made from a single length of wire by making three or more successive loops and twisting each one into shape. These loops are shaped leaf-like and arranged in cup form.

Dipping: The wire forms are dipped smoothly and deeply into the Flex-Span with a scooping motion to permit the plastic to form a "curtain" across the open area in the wire loops. If bubbles appear, they can be removed by immediately re-dipping into the Flex-Span. Avoid using wire that is to springy. Avoid haste. If the bridging breaks, dip again.

Drying: Insert the stem into a clay block while the plastic hardens. After 5 or 10 minutes, it can be removed and set aside to harden for 2 to 3 hours.

Coloring: Paints are applied by brush on the **reverse** sides of the object and show thru the top or front side smooth and glossy. Colors may be used straight, mixed or blended while painting. The solid colors applied on the **reverse** side show thru providing a variety of tones.

Assembling: Flower **petals** are wired together, one at a time, with binder wire. After flower is fashioned, the stem is covered with binding tape. **Leaves** may be individually covered with binding tape and bound to stem. Pins for boutonnieres are wired to stems with binder wire, then covered with binding tape. **Pips** (center stamen for flowers) are made from lengths of colored thread, beads or pearls placed in the center of the flowers and arranging the petals around them. Earring petals are wired together, one at a time, with binder wire. After earring flower is fashioned the stems are cemented together at the base of the petals. After the cement has hardened, stems are cut close to base and the flower is cemented to earpieces.

Leaves or flowers are appropriate and pleasant appliques for Spring or Summer luncheon mats and kitchen curtains—

Trace out and pin in position. If you have a Necchi Sewing Machine just set Zig-Zag Control at size stitch desired for applique edge.

Then all you do is run machine around edge. When finished, cut excess material away from stitch outline.

Make veins in leaves by setting lever to finest Zig-Zag stitch. No attachment necessary for this work.

Notes on Nylon

Cutting—When cutting nylon fabric, use well sharpened shears. Leave generous allowance for seams. Select the finest needle that will accommodate the thread. Numbers 11 and 00 or their equivalents are best for most nylon fabrics. Sharply pointed pins and sharp, fine needles penetrate tough nylon easier and give better results in basting.

Thread—Nylon thread is recommended for nylon fabrics. Seams sewn with nylon thread are durable, dry quickly when washed, and will not shrink.

Finishing—Seams on nylon fabrics, as on all fine fabrics, should be carefully made without raw edges. Bound, French, edge stitched, or overcast seams help assure resistance to raveling. Pinking the edges will be sufficient for some tightly woven fabrics. Your decision on finishing should be based on whether or not your particular fabric tends to ravel. When finishing seams with bindings, be sure they are nylon or of pre-shrunk material. Well finished seams will help preserve the beauty and durability of nylon articles.
